

Title of your presentation

F. Author¹ and S. Author²

¹*The institution of the first author*

²*The institution of the second author*

E-mail: corresponding@author.com

This is a simple L^AT_EX template to be used for an abstract of your presentation at the Humboldt Kolleg "Controlling quantum matter: From ultracold atoms to solids", <http://vu.lt/hk18>. If more than one author is listed, the name of the presenting author should be underlined in the list of authors. The abstract should be not more than **one page long**. You can place references [1, 2] or include a figure in the abstract.

The book of abstracts will not be printed. Instead the abstracts will be published online at the conference website: <http://vu.lt/hk18>. You will be able to find there the abstracts a couple of days before the Kolleg. The abstracts should be available indefinitely after the Kolleg.

The organisers advise to use this template. Yet it is not compulsory. You can also submit an abstract as an **A4 PDF document** produced using other methods.

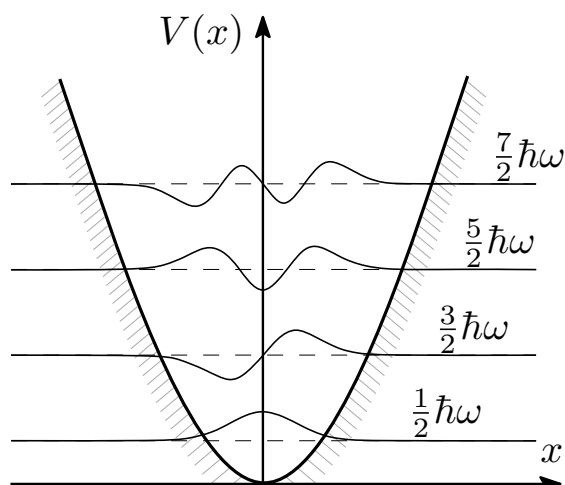

FIG. 1: Figure with a caption.

[1] A. Author, Phys. Rev. E **71**, 999999 (2005).

[2] B. B. Mandelbrot, *Multifractals and 1/f Noise* (Springer, New York, 1999).
